Bio-MED
REGULATED WASTE SOLUTIONS

17 Gallon Chemotherapy Reusable Container

Features Specifications & Advantages

Specifications	IN / LB
Width	20
Depth	12.5
Height	25.9
Maximum Capacity	17 Gal
Fill Capacity	12.75 Gal
Weight	9.55

- Yellow Color for Chemo Identification – Bright yellow clearly identifies chemotherapy waste and meets regulatory color-coding requirements.
- High Capacity for Oncology Centers – Large 17-gallon capacity ideal for infusion clinics and oncology practices with high chemo waste volume.
- Reusable for Cost Savings – FDA-cleared for 300 cycles, providing long-term value and reducing container costs.
- EPA P-Listed Waste Compliant – Designed for compliant disposal of EPA-regulated trace chemotherapy waste.
- Durable & Leak-Resistant – Made from HDPE and clarified PP for superior puncture and leak resistance.
- Space-Saving Design – Nestable and stackable for efficient storage when empty or full.
- Secure Locking System – Semi-transparent locking sub-lid allows fill-level visibility with secure closure.
- Fully Compliant – Meets OSHA, EPA, DOT, and international standards for hazardous pharmaceutical waste.
